

SIMON LECHEVALIER

Integration / API / Automation Engineer - FastAPI, Python, PostgreSQL, workflows, product delivery

simon.lechevalier@hotmail.fr | [LinkedIn](#) | [GitHub](#) | [CV Web](#) | [Portfolio](#)

PROFILE

Developer focused on practical integrations, API workflows, automation, data persistence, and product delivery. Comfortable connecting frontend clients, backend services, LLM/audio APIs, databases, and deployment pipelines. Open to junior/mid engineering roles, startup environments, solutions/integration engineering, and freelance work.

FEATURED PROJECTS

Jarvis Voice Assistant

Stack: React Native, Expo, FastAPI, Deepgram, Groq, PostgreSQL, Redis, Docker

- Built a functional spoken question-to-answer pipeline around 2 seconds across STT, LLM, TTS, APIs, and persistence.

ConvAI Speech Analysis Agent

Stack: Python, LLM APIs, audio ingestion, structured JSON outputs, automation workflows

- Created a reusable workflow that turns speech recordings into summaries, extracted insights, and automation-friendly JSON.

Teclis Scientific

Stack: Next.js, React, TypeScript, Tailwind CSS, Sanity CMS, REST APIs, SEO, multilingual architecture

- Revamped a legacy Wix system into a CMS-driven Next.js platform and expanded multilingual support from 3 to 10 languages.

StreamArena / UpArena

Stack: Next.js, React, TypeScript, PostgreSQL, Web3 libraries, smart-contract interactions

- Designed Web2-friendly interfaces for Web3 prediction flows, wallet actions, transaction feedback, and onboarding.

PROFESSIONAL EXPERIENCE

Full-Stack Developer - Freelance (Aug 2022 - Current)

- Built web and mobile applications with React, Next.js, React Native, FastAPI, Python, APIs, automation, SEO, CMS, and delivery.

Full-Stack Developer - Teclis Scientific (Jun 2025 - Nov 2025)

- Modernized a difficult-to-maintain marketing site into a CMS-driven international platform with cleaner SEO and content workflows.

Web3 Front-End & Integration Developer - Independent Projects (Jan 2022 - Dec 2025)

- Built wallet flows, smart-contract interactions, token-gated experiences, prediction mechanics, and clearer transaction UX.

TECHNICAL SKILLS

Backend	Python, FastAPI, REST APIs, Node.js, structured JSON outputs
Automation	Audio ingestion, LLM APIs, workflow orchestration, data extraction
Data	PostgreSQL, Redis, Supabase, SQL, persistence design
Frontend	React, Next.js, React Native, TypeScript
Delivery	Docker, Git, GitHub, CI/CD, Vercel, debugging, refactoring

ADDITIONAL STRENGTHS

- Strong fit for API integration, automation, internal tools, solutions engineering, and startup delivery roles.
- Able to connect product UX with backend workflow constraints and third-party service reliability.
- Languages: French native, English business level, Japanese conversational.

EDUCATION

University of Geneva - B.Tech in Computer Science - 2018-2022
